

COMPLIANCE REPORT

Powered by TinyFish AI

Report ID	RPT-0001	Date	23 Mar 2026 11:40
Company	ASTRA International	Industry	automotive
Country	Indonesia	Regulations	UU, OJK, LHK

RISK LEVEL:
MEDIUM

SCORE: 35 / 100

ACTION: WARNING

Executive Summary

Astra International remains largely compliant, but faces a transition period with new MOT and OJK regulations. The primary concern in the reviewed activity is the 'Government' involvement in the China-based spare part procurement, which necessitates robust anti-corruption due diligence. Additionally, management must ensure that increasing imports from China do not erode TKDN scores required for automotive industry incentives.

1. Regulation Monitoring Results

Status: CHANGES_FOUND

Indonesia has significantly overhauled its import framework via MOT 16/2025, streamlining licensing and extending reporting windows. Concurrently, OJK has accelerated disclosure deadlines for public companies to 'as soon as possible,' while LHK has updated the PROPER environmental compliance rating system for 2025.

New / Changed Regulations Found:

- MOT Regulation No. 16 of 2025 on Import Policy and Arrangements
- POJK No. 45 Year 2024 on Development and Strengthening of Issuers and Public Companies
- Permen LHK No. 7 Year 2025 concerning PROPER (Environmental Performance Rating)

2. Risk Analysis

The risk is primarily driven by the involvement of government parties and the cross-border nature of the spare part procurement. While the value is manageable for Astra, the regulatory transition to MOT 16/2025 and strict TKDN requirements for automotive tax incentives pose moderate compliance challenges.

Risk Factors:

- Involvement of 'Governments' as a party in a commercial transaction with a foreign (China) entity, increasing anti-corruption (UU Tipikor) and integrity risks.
- Cross-border transaction complexity and potential transfer pricing issues if parties are affiliates.
- Third-party supplier involvement without explicit ESG or supply chain transparency data.

Potential Violations:

- Potential violation of TKDN (Domestic Content) thresholds under UU No. 3 of 2014 and PP No. 29 of 2018 if spare parts from China reduce domestic percentage below incentive requirements.
- Potential reporting delay under MOT No. 8 of 2024 (Article 45) if import realization is not reported by the 15th of the following month.

3. Compliance Findings

No	Finding	Level	Related Regulation
1	Transition to MOT 16/2025 requires updated internal reporting workflows for import realization from 15 days to a 30-day window starting August 2025.	LOW	MOT Regulation 16/2025
2	The involvement of government parties in the China-based procurement lacks documented due diligence (KYC/KYB) to mitigate UU Tipikor risks.	MEDIUM	UU No. 31/1999 (Anti-Corruption)
3	New OJK disclosure rules (POJK 45/2024) require 'as soon as possible' reporting of material facts, which may include significant cross-border supply chain disruptions.	HIGH	POJK 45/2024

4. Recommended Actions

#	Action	Deadline	Responsible Party
1	Conduct enhanced due diligence on the Chinese supplier and the specific role of 'Governments' to ensure compliance with UU Tipikor and Astra's internal Code of Conduct.	immediate	Compliance & Legal Dept
2	Recalculate TKDN (Domestic Content) impact of the 1,000,000 value import on current vehicle models to ensure eligibility for PPN DTP or other tax incentives.	30 days	Production / Procurement
3	Update the Regulatory Matrix to reflect POJK 45/2024 disclosure timelines and Permen LHK 7/2025 PROPER rating criteria.	90 days	Corporate Secretary

5. Policy Enforcement

WARNING recorded. Process may continue under close monitoring.
