Country	Indonesia	Regulations	UU ITE, OJK, PPATK

RISK LEVEL: HIGH

SCORE: 75 / 100

ACTION: REVIEW_REQUIRED

Executive Summary

PT E-Commerce Nusantara faces high regulatory risks due to new OJK regulations in the ITSK sector (POJK 30/2025) and its involvement in cross-border marketplace activities. Current activities involving Indonesian buyers and Malaysian sellers with a Singaporean processor trigger strict OJK and APU PPT requirements. Immediate action is required to align governance structures with the 2025-2026 regulatory updates to avoid potential sanctions.

1. Regulation Monitoring Results

Status: CHANGES_FOUND

Significant updates were found in the ITSK sector with the issuance of POJK 30/2025, which mandates stricter governance and risk management for technology-driven financial activities. The cross-border nature of the company's transactions necessitates strict adherence to POJK 8/2023 and the framework established by POJK 3/2024.

2. Risk Analysis

The cross-border transaction flow involving three distinct jurisdictions and sensitive data processing presents a high regulatory risk profile. The primary concerns are the lack of verifiable ITSK registration and potential gaps in Enhanced Due Diligence (EDD) as required by OJK and PPATK standards.

Risk Factors:

- Keterlibatan pihak ketiga (Payment Processor di Singapura) meningkatkan risiko keamanan data dan kepatuhan vendor.
- Transaksi lintas negara (Malaysia-Indonesia-Singapura) memiliki profil risiko tinggi terhadap pencucian uang (APU PPT).
- Pemrosesan data sensitif pelanggan memerlukan kepatuhan terhadap standar keamanan siber OJK terbaru.

Potential Violations:
