Report ID	RPT-0001	Date	23 Mar 2026 13:26
Company	Suzuki	Industry	otomotif
Country	Japan	Regulations	Road Transport Vehicle Act, Act on Recycling of

RISK LEVEL:
CRITICAL

SCORE: 72 / 100

ACTION: BLOCK

Executive Summary

Suzuki's EV expansion is currently challenged by a rapidly evolving regulatory landscape, notably the execution of U.S. automotive tariffs and stricter Japanese export controls implemented in 2025. Immediate attention is required to re-verify Chinese supply chain partners against the newly updated End User List and to adapt data governance to the 2025 Mobility DX Strategy. Proactive engagement with METI's support task force is recommended to mitigate trade risks associated with the U.S. market.

RISK LEVEL OVERRIDE — System upgraded risk level due to inconsistency with findings:

- Finding level CRITICAL detected — risk level upgraded from HIGH to CRITICAL.

No assumption-based statements detected. Analysis references verified regulatory sources.

1. Regulation Monitoring Results

Status: CHANGES_FOUND

Recent amendments to the Foreign Exchange Order (April 2025) and the updated End User List (September 2025) significantly tighten controls on cross-border technology transfers and supply chain partners. The establishment of a METI task force for U.S. automotive tariffs (April 2025) signals a major change in the trade environment for Japanese vehicle exports.

New / Changed Regulations Found:

- METI Establishes Task Force for U.S. Tariffs and Support Measures — source: https://www.meti.go.jp/english/press/2025/0403_001.html
- Mobility Digital Transformation (DX) Strategy Update for SDVs — source: https://www.meti.go.jp/english/press/2025/0609_001.html

2. Risk Analysis

The primary compliance risks are centered on the 2025 U.S. automotive tariffs and the enhanced Japanese export control regime (FEFTA) which restricts sensitive EV-related technology transfers. The involvement of Chinese battery suppliers and cloud-based data processing adds significant exposure to

restricted entity lists and new digital mobility standards.

Risk Factors:

- Execution of U.S. tariffs on automobiles as of April 2025.
- Dependence on Chinese battery suppliers potentially subject to the updated September 2025 End User List.
- Strict data processing and cybersecurity requirements for Software Defined Vehicles (SDV).

Potential Violations:

- Potential violation of updated FEFTA (April 2025) regarding EV technology exports — source: https://www.meti.go.jp/english/press/2025/0404_001.html
- Potential non-compliance with new SDV data standards in Mobility DX Strategy — source: https://www.meti.go.jp/english/press/2025/0609_001.html

3. Compliance Findings

No	Finding	Level	Regulation / Source
1	Planned exports to the United States are subject to new tariff measures announced by METI in April 2025.	HIGH	Trade Control/U.S. Tariff Support Measures https://www.meti.go.jp/english/press/2025/0403_001.html
2	Chinese battery suppliers require re-validation against the updated September 2025 End User List to avoid FEFTA violations.	CRITICAL	Foreign Exchange and Foreign Trade Act https://www.meti.go.jp/english/press/2025/0929_003.html
3	Cloud-based data processing for the new EV line must be updated to comply with the June 2025 Mobility DX Strategy for SDVs.	MEDIUM	Mobility Digital Transformation (DX) Strategy https://www.meti.go.jp/english/press/2025/0609_001.html

4. Recommended Actions

#	Action	Deadline	Responsible Party
1	Engage METI Consultation Counters regarding U.S. tariff impact and cash flow support.	immediate	Global Trade Division
1	Conduct a comprehensive KYC audit of all Chinese battery suppliers against the September 2025 End User List.	30 days	Compliance/Supply Chain Dept
2	Align EV cloud data protocols with the June 2025 Mobility DX Strategy standards for cybersecurity and data infrastructure.	90 days	IT/R&D Dept

5. Policy Enforcement

■ BLOCK

Process BLOCKED. Immediate escalation to Compliance Officer required.

Risk Score: 72/100 | Risk Level: CRITICAL | Action: BLOCK

This process has been BLOCKED due to critical compliance violations. No further action may be taken until all critical findings are resolved. The Compliance Officer must be notified immediately and a formal remediation plan must be approved before the process can resume.

Key Findings Driving This Decision:

[HIGH] Planned exports to the United States are subject to new tariff measures announced by METI in April 2025. (Trade Control/U.S. Tariff Support Measures)

[CRITICAL] Chinese battery suppliers require re-validation against the updated September 2025 End User List to avoid FEFTA violations. (Foreign Exchange and Foreign Trade Act)

Regulatory Changes Detected (5):

- Cabinet Order to Partially Amend the Foreign Exchange Order (April 2025) — source: https://www.meti.go.jp/english/press/2025/0404_001.html
- Review of the End User List (September 2025) — source: https://www.meti.go.jp/english/press/2025/0929_003.html
- Update of the List of Classifications of Listed Companies under FEFTA (September 2024) — source: <https://www.mof.go.jp/english/index.htm>

Active Risk Factors:

- Execution of U.S. tariffs on automobiles as of April 2025.
- Dependence on Chinese battery suppliers potentially subject to the updated September 2025 End User List.
- Strict data processing and cybersecurity requirements for Software Defined Vehicles (SDV).

Immediate Actions Required:

1. [immediate] Engage METI Consultation Counters regarding U.S. tariff impact and cash flow support. — Global Trade Division
1. [30 days] Conduct a comprehensive KYC audit of all Chinese battery suppliers against the September 2025 End User List. — Compliance/Supply Chain Dept
