Executive Summary

PT E-Commerce Nusantara faces high regulatory risks due to cross-border operational complexities and new 2025-2026 OJK regulations. Immediate attention is required for UU PDP compliance regarding sensitive data transfers and enhanced merchant due diligence under APU PPT rules. Adopting the POJK 30/2025 framework is essential for maintaining regulatory standing.

1. Regulation Monitoring Results

Status: **CHANGES_FOUND**

Regulatory monitoring reveals that OJK has modernized governance standards for ITSK through POJK 30/2025 and enhanced APU PPT reporting in 2025. Additionally, UU ITE (Amended 2024) and UU PDP (2022) are now fully enforceable, significantly impacting cross-border e-commerce and data handling.

2. Risk Analysis

The company's cross-border transaction processing involves significant compliance risks regarding international data transfers and anti-money laundering (APU PPT) protocols. The involvement of foreign third parties and sensitive data requires strict adherence to the now-enforceable UU PDP and updated OJK governance rules.

Risk Factors:

- Cross-border sensitive data transfer to Singapore without verified protection adequacy
- Transaction processing involving foreign parties (Malaysia) requiring Enhanced Due Diligence (EDD)
- New governance and risk management requirements for ITSK under POJK 30/2025

Potential Violations:
