Company	PT E-Commerce Nusantara	Industry	E-commerce
Country	Indonesia	Regulations	UU ITE, OJK, PPATK

RISK LEVEL: HIGH

SCORE: 65 / 100

ACTION: REVIEW_REQUIRED

Executive Summary

PT E-Commerce Nusantara is currently at a high risk level due to complex cross-border transaction processing and sensitive data handling. While fundamental regulations like UU ITE are acknowledged, the company must urgently adapt to POJK 8/2023 (APU-PPT) and the new POJK 30/2025 (ITSK) governance requirements. Immediate updates to cross-border monitoring and data privacy frameworks are required to avoid potential sanctions from OJK and PPATK.

■ No assumption-based statements detected. Analysis references verified regulatory sources.

1. Regulation Monitoring Results

Status: CHANGES_FOUND

Recent updates include POJK 30/2025 which introduces stricter governance and risk management for fintech/ITSK providers. Additionally, FATF has issued new high-risk jurisdiction lists as of February 2026, impacting cross-border transaction monitoring requirements under POJK 8/2023.

2. Risk Analysis

The high risk score is driven by the cross-border nature of transactions and the processing of sensitive data, which trigger mandatory EDD and data protection protocols. Failure to align with the new POJK 30/2025 governance standards and the latest FATF February 2026 guidelines poses significant regulatory risk.

Risk Factors:

- Cross-border transaction complexity involving three different jurisdictions (ID, MY, SG).

- Processing of sensitive personal data without explicit reference to UU PDP 2022 compliance.
- Engagement of a third-party payment processor in Singapore requiring cross-border transfer oversight.
